Wet-Mesic Prairie Mix

This mix is patterned after natural prairie communities with mesic to wet soils and full sun. Species in this mix can tolerate a wide range of conditions including seasonal saturation as well as dry periods during the summer months. Not intended for long-term flooding or fully saturated areas, this mix will also do well in most stormwater detention basins or can be planted just upslope from wetland areas.

Total Seeding Rate: 32.5 lbs per acre
 5 lbs grasses • 2.5 lbs forbs • 25 lbs nurse crop
 67 native seeds per sq ft

Call, email or visit our website for pricing.

Grasses & Sedges		PLS Oz/acre
