## Wet-Mesic Prairie Mix

This mix is patterned after natural prairie communities with mesic to wet soils and full sun. Species in this mix can tolerate a wide range of conditions including seasonal saturation as well as dry periods during the summer months. Not intended for long-term flooding or fully saturated areas, this mix will also do well in most stormwater detention basins or can be planted just upslope from wetland areas.

Total Seeding Rate: 32.25 lbs per acre  
 4.75 lbs grasses • 2.5 lbs forbs • 25 lbs nurse crop  
 66 native seeds per sq ft

Call, email or visit our website for pricing.
