Stormwater Mix

This mix is designed to withstand the low water quality and highly variable conditions associated with stormwater features. Most of the species are salt tolerant and most species will do well in mesic to wet hydrology with others filling in the wettest and driest ends of the spectrum. The high native seed count and heavy annual nurse crop in this mix ensure full and aggressive establishment.

Total Seeding Rate: 36.5 lbs per acre
 3.45 lbs grasses • 3.05 lbs forbs • 30 lbs nurse crop
 118.35 native seeds per sq ft
